

ROCK MECHANICS

POINT LOAD TESTER - AS4133.4.1

Australian designed and manufactured for heavy use in rugged conditions.

- Large footprint baseplate and 'remote' hydraulic pump provide industry leading stability during high strength testing.
- Includes robust transportation case.
- Fully serviceable, with all components and spare parts readily available.

- 50kN \pm 0.1 capacity with extremely precise linear electronic load cell. Direct load measurement in kN-no conversion factors necessary.
- In-built platen separation scale, with adjustable zero displacement.
- Complies with all requirements of AS 4133 Point Load Test.

- Load Indicator powered by 9v DC battery for easy replacement, low maintenance and full portability.
- Peak Load Value displayed for up to four minutes after completion of the test - and can be manually recalled later if required.

SPECIALISTS IN THE SUPPLY OF CIVIL ENGINEERING MATERIALS TESTING EQUIPMENT

Quality and Assurance Guaranteed 

SYDNEY – PH: 02 9457 8755 FAX: 02 9457 9887 2/42 BEAUMONT RD, MT KURING-GAI, NSW. 2080
